ZEUS ⚡ APPOLLO™

Zeus Appollo™ Monitoring System

Zeus Appollo™ is dedicated to providing the best, most sophisticated and cost effective PV monitoring software and hardware products available in the PV industry. Users are able to monitor their PV stations effectively via the Solarmine™ EzExplorer, Solarmine™ Portal and Solarmine™ Apps (Android/IOS). Featured with a powerful, comprehensive and easy to operate service platform, Zeus Appollo™ enable users to monitor their PV stations anytime, anywhere. Zeus Appollo™ can help to ensure the effective uptime of PV stations, reducing operational and maintenance costs therefore maximizing yield and return of investment.

⚡ Zeus Appollo™ Monitoring System

Zeus Appollo™ Monitoring System contains:
Zeus Appollo™ EzLogger
Solarmine™ EzExplorer
Solarmine™ Portal
& Solarmine™ Viewer App

⚡ Zeus Appollo™ EzLogger

By collecting information from inverters such as status and performance, Zeus Appollo™ Ezlogger makes the long-term monitoring of PV stations feasible and efficient. Real-time data can be collected accurately and transmitted to the Solarmine™ Portal server via a RS485 connection.

⚡ Solarmine™ EzExplorer – Local Monitoring Software

The user-friendly, powerful PC based software enables collection and analysis of local, inverter-level and Zero Feed inbox data. Users can conveniently check the daily, weekly, monthly and annual production historical data.

⚡ Solarmine™ Portal – www.solarmine.com.au

Our Solarmine™ Portal features:
- Web-based remote management
- Visualized real-time data and historical data for analysis and easy understanding
- Attractive presentation with various graphs
- Various data displayed, e.g. yield, environmental and local data
- Analysis of the efficiency and performance of PV stations
- Real-time alarms and diagnosis
- Simple management of multiple systems
- Multi-level management for satisfying specific demands of end users and distributors
- Regular emailing of data and event reports
- Sharing of system information and data is available through the portal

⚡ Solarmine™ Viewer App

| Solarmine Viewer for iPhone	Solarmine Viewer for Android

Features:
- Real-time and historical data displayed via internet at any time
- Visualized data with transparent graphs
- Daily/monthly/annual/overall data displays
- Easy to use and download (Available from the Apple Store & Google Play)
- Green information - CO2 savings and tree planting information displayed
